

Ratio of renewable energy to total electricity generated

※1 excl. hydroelectric  
 ※2 Totals do not match due to rounding.

Principal renewable energy types (excl. hydroelectric)	Germany (2017)	Spain (2017)	United Kingdom (2017)	France (2017)	Italy (2017)	United States (2017)	Canada (2017)	China (2016)	Japan (2017)
Principal renewable energy types (excl. hydroelectric)	Wind power 16.4%	Wind power 18.0%	Wind power 14.9%	Wind power 4.4%	Solar power 8.6%	Wind power 6.1%	Wind power 4.7%	Wind power 3.8%	Solar power 5.2%
Target year	① 2025 ② 2035	2020	2030	2030	2020	2035	— (Not set at the national level.)	2020	203
Target ratio of renewable energy introduction	① 40~45% ② 55~60% Total power ratio	40% Total power ratio	44% (※3) Total power ratio	40% Total power ratio	35~38% Total power ratio	80% Clean energy (including nuclear power plant) Total power ratio	— (Not set at the national level.)	15% Non-fossil share of primary energy	22~24% Total power ratio

※3 One of multiple scenarios
